

GLOBAL TECHNOLOGY LEADERS SUMMIT

Subodh Bapat
Vice President
Sun Microsystems

Subodh Bapat is a Vice President and Distinguished Engineer at Sun Microsystems, responsible for driving Sun's systems level energy strategy. This includes:

- energy management architectures,
- specifications, tools and standards for the entire stack,
- from power-efficient microprocessors and hardware systems,
- up through energy management algorithms in the virtualization and operating system software layers.

Subodh has served as CTO for Sun's Volume Systems Division, in which role he drove the expansion of Sun's SPARC systems portfolio to include Opteron-based systems. Subodh was responsible for the overall technology direction for all of Sun's rack-mount and blade servers, including architecture, strategy, and standards.

More recently, Subodh served in Sun's Software division as CTO for Sun's product line for connected services and systems management. Subodh has also spearheaded a number of acquisitions for Sun.

Prior to Sun, Subodh's experience Sun includes 11 years in the fields of networking, telecommunications, embedded systems, and network and systems

management. Subodh has authored numerous published papers in industry journals, as well as books on network architecture. He is a frequent invited speaker at industry conferences and holds sixteen patents.
