Ray Ozzie
Chief Software Architect
Microsoft Corporation

David Kirkpatrick
Senior Technology Editor
Fortune Magazine

NETWORKING BREAK

10:15 a.m. – 10:30 a.m.

CONCURRENT SESSIONS

10:30 a.m. – 11:45 a.m.

Financing the World's Emerging Technologies

While venture capitalists regard the United States as the global leader in technological development and innovation, they also recognize that pockets of technology innovation are thriving worldwide. The distinguished financiers on this panel will share their views on financing the world's emerging technologies as well as the role that US investors, strategic investors and capital markets play in developing technologies worldwide and the role that non-US investors play in developing technologies in the US.

Moderator:

Frank Quattrone
CEO
Qatalyst

Panelists:

Tim Draper
Founder and Managing Director
Draper Fisher Jurvetson

Robert Grady
Managing Director
The Carlyle Group

Rocky Lee
Partner, China
DLA Piper

Ken Wilcox
President and CEO
Silicon Valley Bank Financial Group

Latest Developments in Business Models

Enterprise software customers are increasingly accepting subscription and on-demand models. Our industry experts will examine new business models enabled by the Internet and new technologies and services, in particular open source, SaaS, utility computing and social networking.

Moderator:

Paul Saffo
Futurist
Stanford University

Panelists:

Corey Goodman
President
Biotherapeutics and
Bioinnovation Center
Pfizer

Alireza Mahmoodshahi
CTO
COLT

Zach Nelson

NetSuite

Adam Selipsky
Vice President of Product Management
and Developer Relations
Amazon Web Services

2008 TECHNOLOGY LEADERS SUMMIT AGENDA (CONTINUED)

LUNCH AND PRESENTATION

12:00 p.m. – 2:00 p.m.

Senator George J. Mitchell

Global Chairman
DLA Piper

Jonathan Schwartz

President and CEO
Sun Microsystems

CONCURRENT SESSIONS

2:15 p.m. – 3:15 p.m.

Technology and Government

The United States government invests billions of dollars annually in basic technological research and development, and government demand has driven such innovations as GPS, the Internet and supercomputing. This discussion will consider the government's role as a catalyst for technology and emerging areas of research, including intelligent transportation systems and health information technology.

Moderator:

Steve Westly
Managing Partner
*The Westly Group, and
former California State Controller*

Panelists:

Paul Brubaker
Administrator, Research and
Innovative Technology Administration
US Department of Transportation

Teri Takai

CIO
State of California

Dr. Robert Kolodner

National Coordinator for Health
Information Technology
*US Department of Health
and Human Services*

Mobile Computing and Content

As workforce trends push toward 24/7 connectivity, what is needed to empower the next generation of mobile work force and mobile data consumers? These prominent leaders will share their visions of the next generation of data management and communication devices and discuss whether true interoperability is achievable in the near term.

Moderator:

David Kirkpatrick
